Animal Welfare Science

Debunking the Idyllic View of Natural Processes: Population Dynamics and Suffering in the Wild

Horta, Oscar (2010) "Debunking the idyllic view of natural processes: population dynamics and suffering in the wild", Télos, 17 (1), 73-88.

The most comprehensive academic paper arguing for the net suffering over enjoyment in the wild and defending its moral importance.

Filling the Ark: Animal Welfare in Disasters

Irvine, L. (2009). Filling the ark: Animal welfare in disasters. Philadelphia: Temple University Press.

A sociological study into the impact disasters have on animals, including companion animals, farmed animals, birds and marine wildlife, and animals used in research. The study finds that most risks faced by animals are human-caused, and as such can be changed to prevent animal suffering in disasters.

Look who is talking animal welfare!

Finds an increasing proportion of animal agriculture publications that mention animal advocacy relative to all animal agriculture publications from roughly 1995 to 2012, with the Humane Society of the United States

How Should We Evaluate Social Media Impact?
Mar 30, 2016

RESOURCES

1. Every researcher informally notes interesting papers they come across
2. Periodically the notes are aggregated in a spreadsheet, including summaries and bibliographical information
3. New entries are created on the website

Not suitable for rapidly growing amount of research

Our Tasks & Goals

Research Outcome

Frontend

Staff

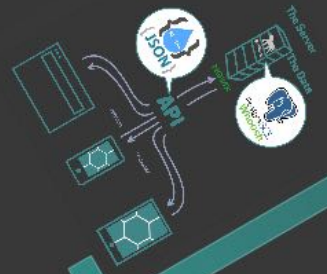
- Adding new papers
- User-friendly interface
- Metadata suggestions
- Automatic keyword extraction

Visitor

- Full text search with auto-complete
- Different categories
- User-friendly search interface
- Neatly embedded in ACE's website

Backend

- Separation of concerns, MVC architecture
- Secure and scalable DBMS
- Webserver for dynamic content
- High performance webserver for static content
- Programmable API, so the backend is agnostic to the frontend that queries it
- Search engine and automatic keyword extraction



Research Outcome

Another striking observation was the participants' tendency to use the site's internal search engine rather than attempting to navigate through the site by clicking. Participants consistently desired an easy and familiar search process—regardless of the accuracy of the search's results,

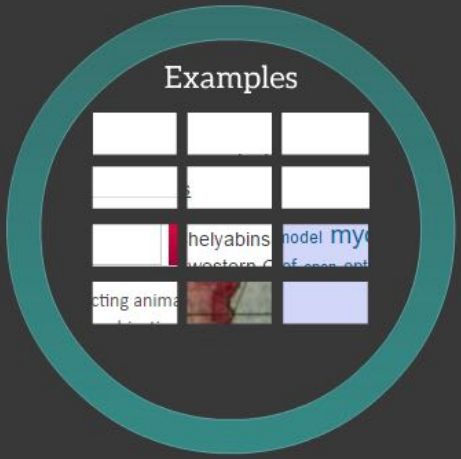
(Augustine & Green, 2002)

Discovering How Students Search a Library Web Site: A Usability Case Study

Digital library is an information system over a network that is organized, well-managed, and supports the creation, use, and searching of digital objects. Digital library should be looked as a tool that supports user's information task. Users are looking for an information system that is easy and intuitive to use.

(Jeng, 2005)

Usability Assessment of Academic Digital Libraries: Effectiveness, Efficiency, Satisfaction, and Learnability



What does our library need?

More research for evaluation than planning

Judy Jeng

Appendix A. Usability Testing Questions

The goal of this test is to evaluate the usability of the library's Web site. I will ask you a series of questions and would like you to think out loud while you look for the answer. Some questions are easy and some are more difficult. Do not worry if you can't find the answer every time. Please remember that we are testing the effectiveness of the site design and this is not a test of you. The whole test should take less than an hour. I thank you.

1. **Does the library have a copy of *Gone with the Wind*, book format, by Margaret Mitchell?**

   Please rank from 1 to 5 regarding the ease of use of the system, 1 being the easiest and 5 being the most difficult.

   1 2 3 4 5
   Easy to use Difficult to use

   Your comment: _____

   _____

2. **Does the library currently subscribe to paper copy of *Advertising Age?***

   1 2 3 4 5

Place Vendôme; the Right Side of the Barricade in the Rue Castiglione
The Franco-Prussian War was brought about by rising tensions between France and Prussia in the 1860s. France, under Emperor Napoleon III, was determined to check the growth of Prussian power and avenge what it saw as a series of diplomatic humiliations. Prussia, under Chancellor Otto von Bismarck, believed that a Prussian-led war of the German states against France would be a decisive act leading to creation of a unified German empire. The conflict began on July 19, 1870, when France declared war. The French army proved woefully unprepared and suffered ...

Railroad Bridge across the Sim River Continuing on the Right
From 1909 to 1912, Russian photographer Sergei Mikhailovich Prokudin-Gorskii (1863–1944) made several trips to the territory around the Ural Mountains, where he photographed railroad installations, factories, urban settings, and natural scenes. In the summer of 1910 Prokudin-Gorskii traveled along the Samara-Zlatoust Railway (built in 1885–92; now the Ufa-Chelyabinsk line). This image shows the eastern outskirts of the town of Miniar (in present-day Chelyabinsk Oblast) along the Sim River. The Sim, some 240 kilometers long, originates in the hills of western Chelyabinsk Oblast and flows southwest to the Belaia ...

Tree of Bugs

Team Organisation

Many to Many and Select2

Others

Git Statistics

Milestone 1

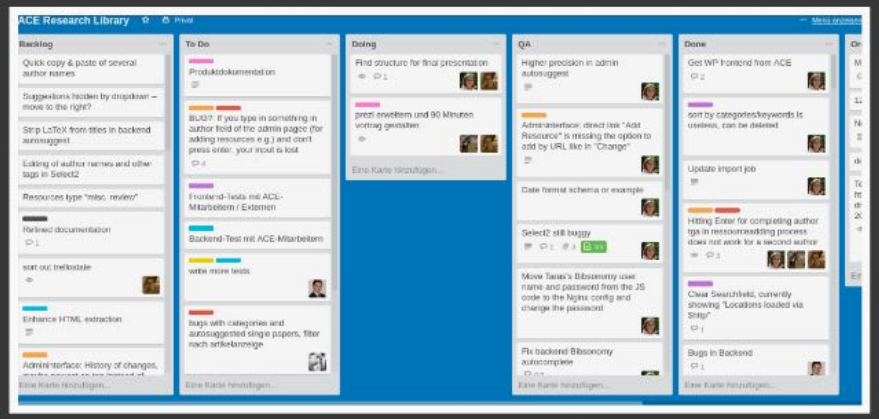
- Team organisation ☺
- Technology decisions ☺
- Staging server 😐
- First runnable version ☺
- Decoupling of frontend and backend development ☺

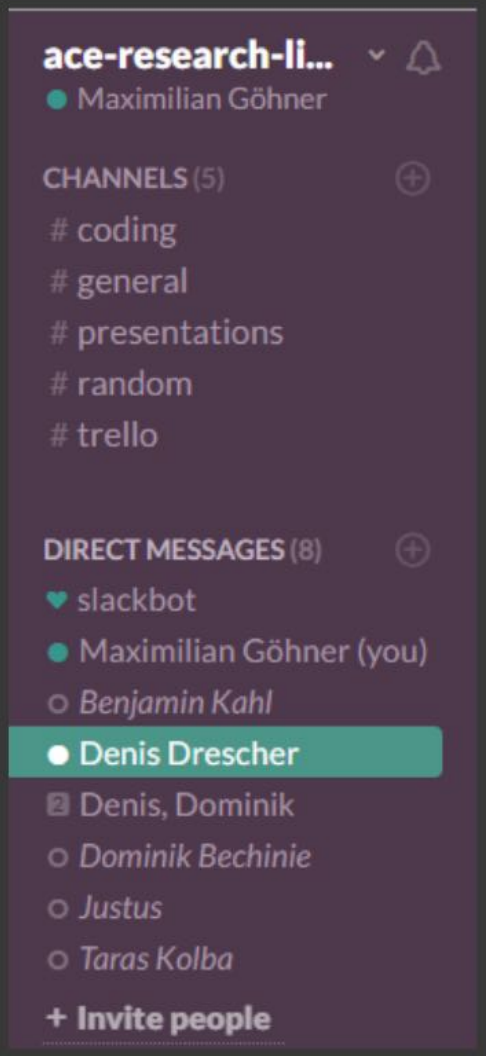
- Self-organized
- Initiated by Denis
- Diverse levels of knowledge
- Partner programming

Division of Labor:

Denis: Libero
Taras: Frontend
Benjamin: Backend/Django Admin
Max & Dominik: Soft Skills & Communication

} Main Roles





- Self-organized
- Initiated by Denis
- Diverse levels of knowledge
- Partner programming

Division of Labor:

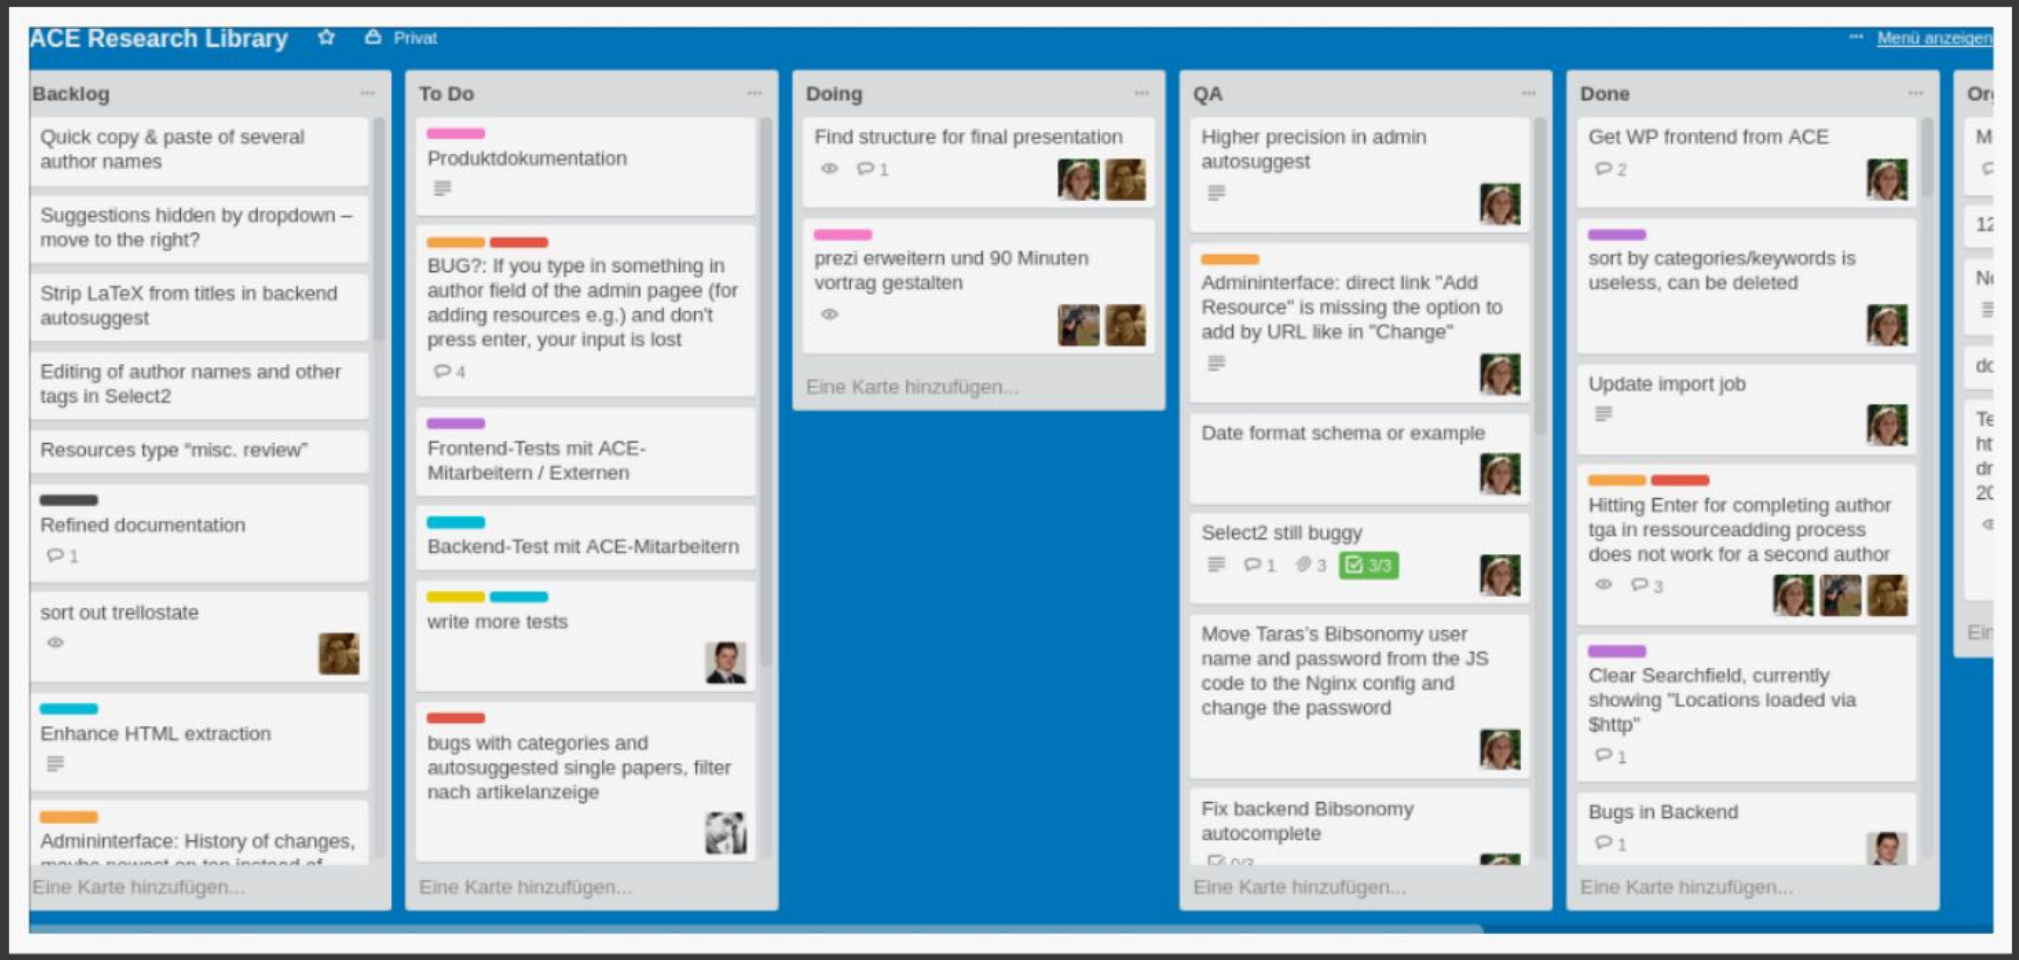
Denis: Libero
Taras: Frontend
Benjamin: Backend/Django Admin
Max & Dominik: Soft Skills & Communication

} Main Roles

Taras Kolba

+ Invite people

Max & Dominik: Soft Skills & Communication



Milestone 2

- Database model
- Search frontend development using mock data
- API development on the controller layer
- Merging of development stands by updating the interfaces

Frontend

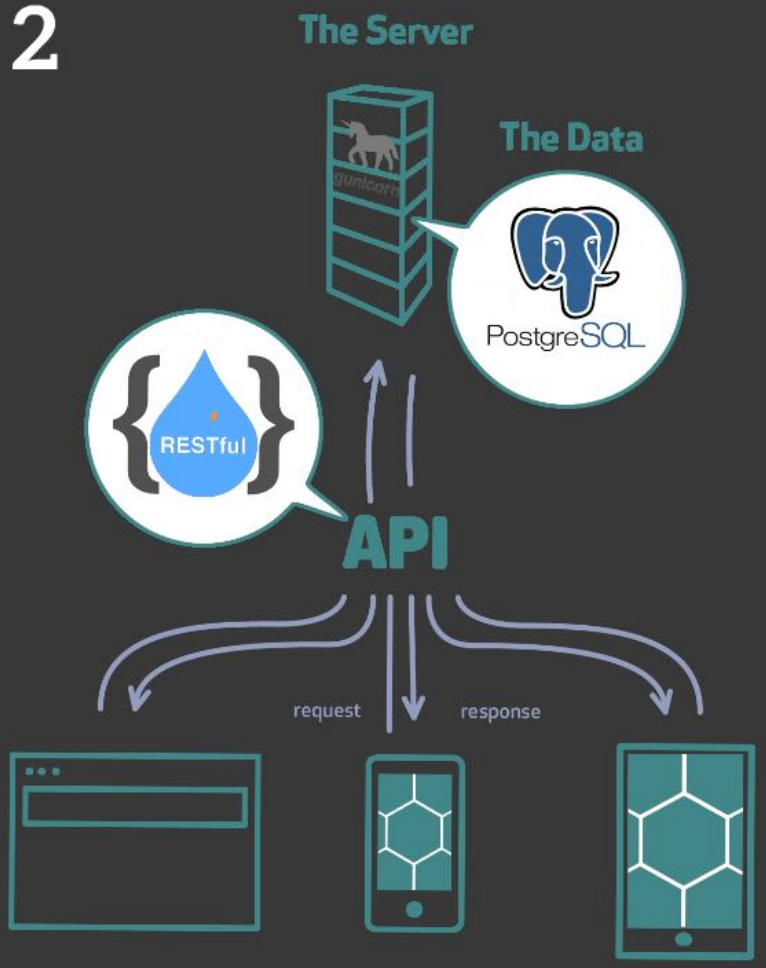
Milestone 2

- Database model
- Search frontend development using mock data
- API development on the controller layer
- Merging of development stands by updating the interfaces



Milestone 3

- Search indices
- Continual indexation
- Admin design
- Automatic deployment
- Keyword extraction

Milestone 4

Polish & improve

- Frontend
  - Protype fitting
  - Filter
  - Sorting
  - Pagination
- Admin interface
- Keyword extraction
- Search

Milestone 5

Interviews

- Taking Google Scholar as initial state
- Getting information about used/unused features and encountered problems
- Extract important informations for our product

Example: Transcript Interview 2

A: Wie oft benutzt du Google Scholar?
B: Zur Zeit fast jeden Tag. [...]

A: Hattest du Probleme bei deiner Suche?
B: Bei Scholar ist z.B. der Fall, dass man sehr schlechte Filterfunktionen hat [...]. Oder dass man, wenn man z.B. nach Zeit filtert, das nicht so einfach zurücksetzen kann [...].

A: Welche Funktionalitäten benutzt du häufig?
B: Wie, welche Funktionalitäten? Da gibt's ja eigentlich nichts. Da gibt man oben einen Begriff ein und dann gibt's an der Seite ne Zeitsache die man einstellen kann [...] viel mehr ist da eigentlich schon nicht los.

A: Gibst zusätzlich Funktionen, die du dir wünschen würdest?
B: Ja wie ich schon sagte, eine Autorensuche vielleicht, eine Fachgebietssuche, also dass man die Artikel schneller ordnen kann, ob's jetzt aus der Physik, Medizin oder Politikwissenschaft kommt. [...]

User-tests

- Great tool to find bugs and think out of the box
- Not that easy to coordinate and to execute
- Maybe a little late

Correction of errors and inefficiencies

Hand-off to maintenance team if necessary

- Maybe a little late

Correction of errors and inefficiencies

Hand-off to maintenance team if necessary

Encountered problems

Server Organisation

Reaching mandatory agreements

Getting required infrastructure and permissions

Tons of Bugs

Vanishing inputs

Filters still apply in the background

Weird visual interactions

AdBlock blocking features

Non-vanishing inputs

Auto-suggest can't find paper

Filters won't show up

Auto-complete inserts wrong information

Team Organisation

Justus

Study

Journeys

Time

Many to Many and Select2

- Many-to-many relationships in Django Admin
- Admin inline forms and limitations
- Nested inline forms, directional limitations
- Tag field, validation problems
- AJAX solutions 1 & 2
- Select2 quirks and solutions 1–3

Others

Wordpress redesign by ACE

Clickstreaming Tool

Ressource type vs. Source type

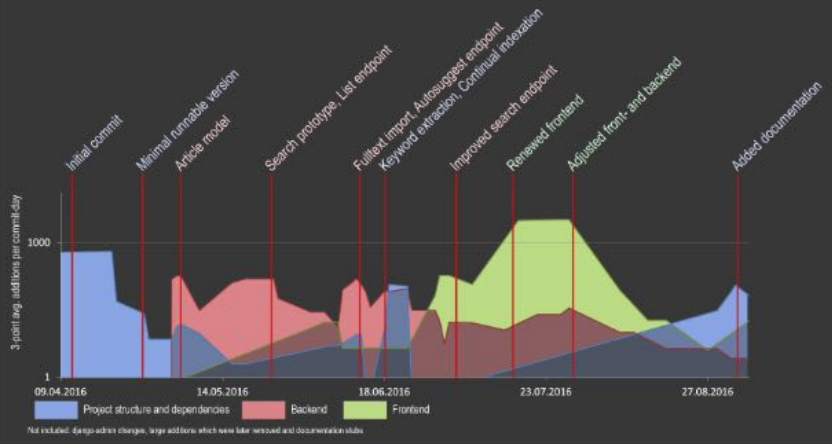
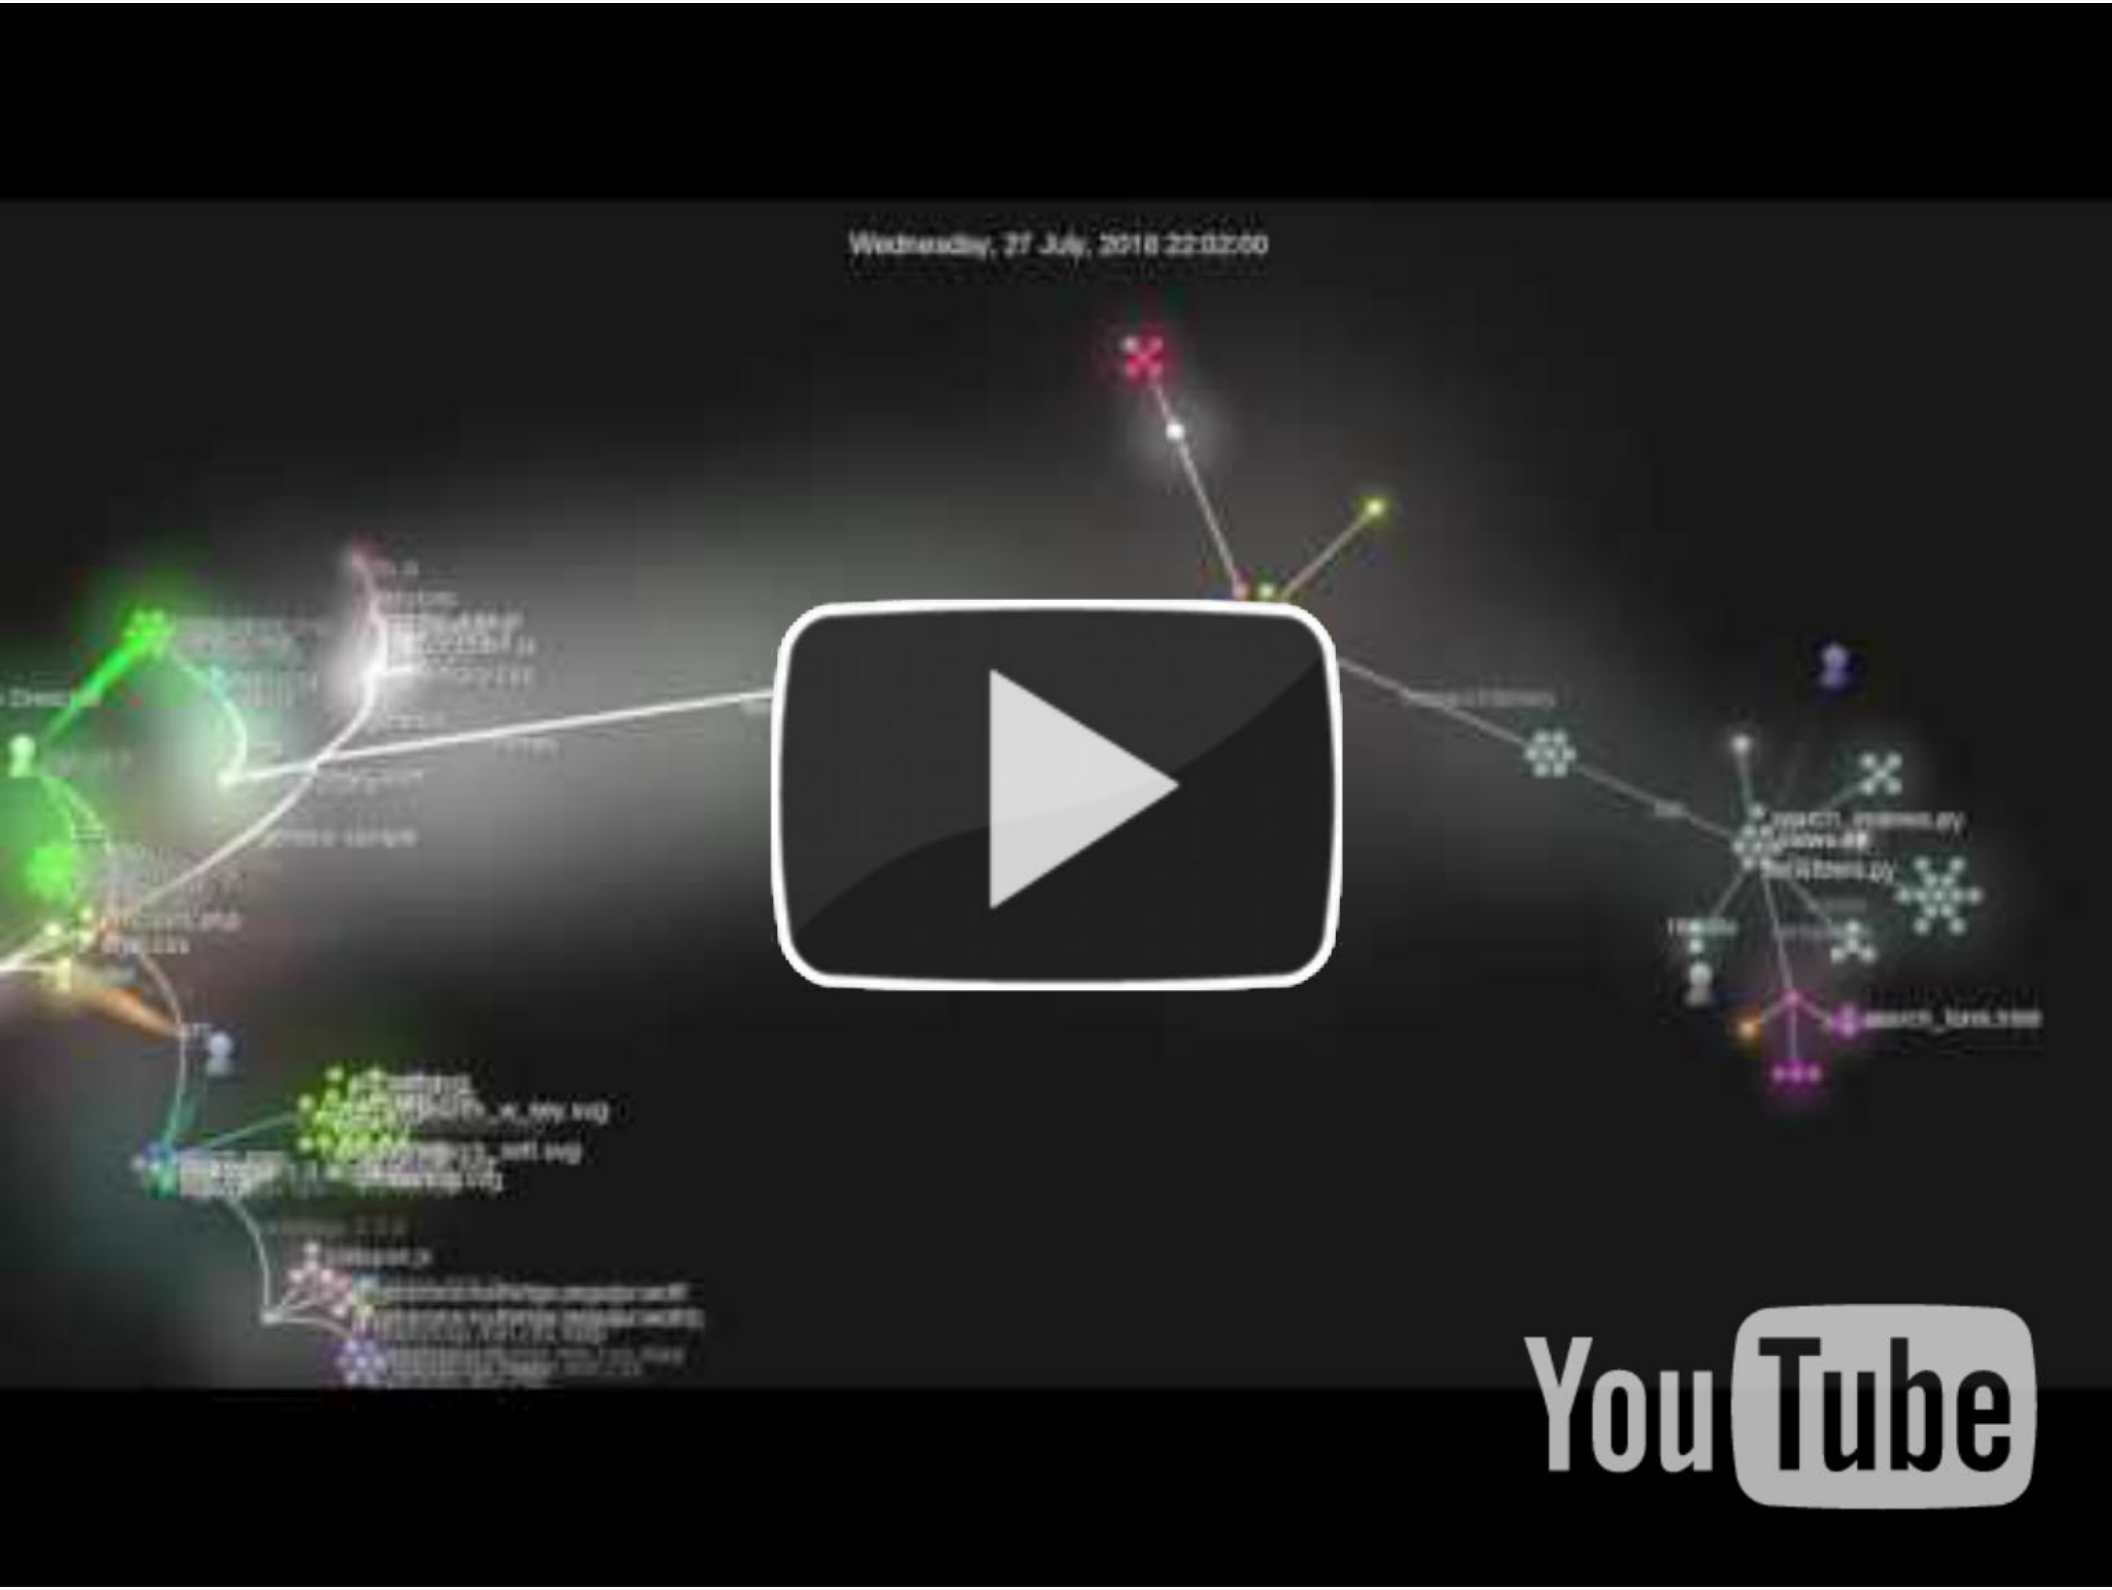
Git Statistics

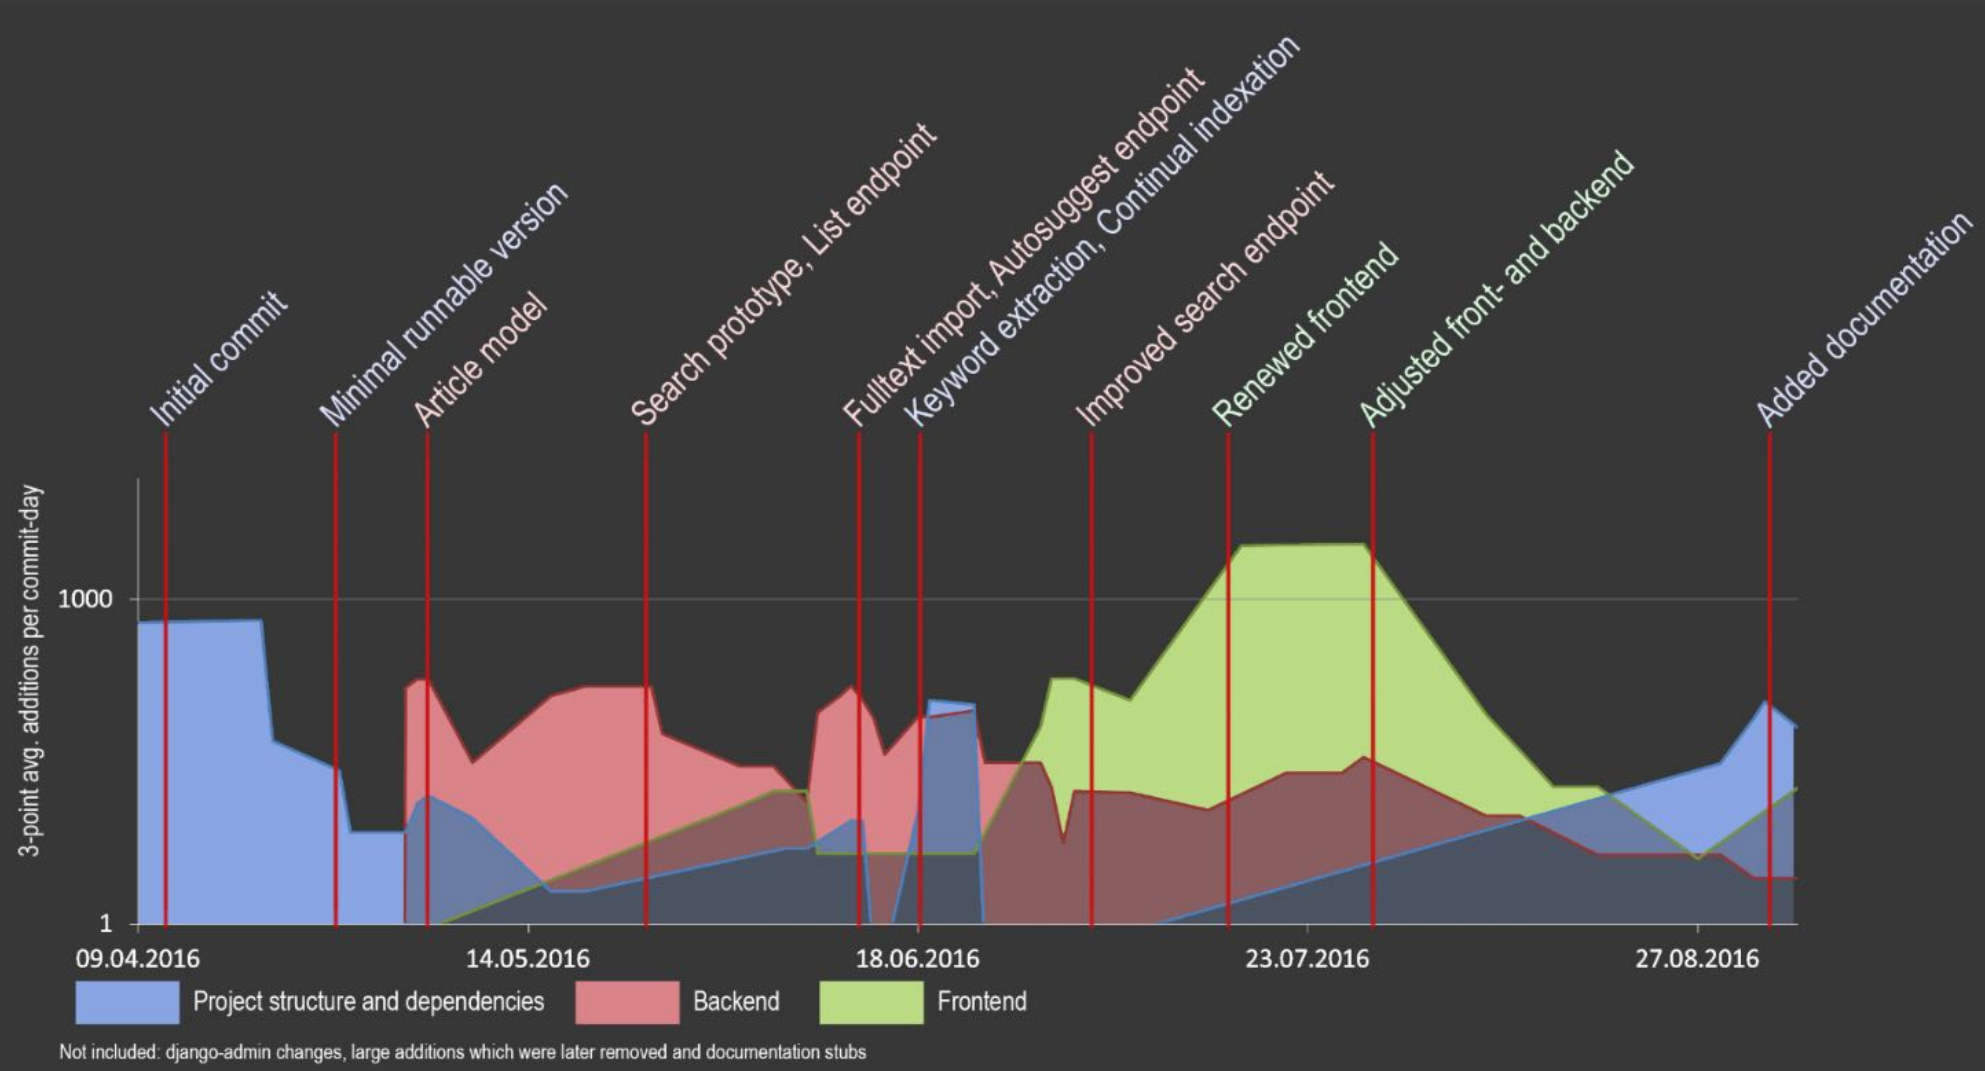
Age: 162 days, 56 active days (34.57%)
Total Files: 100
Total Lines of Code: 6309 (840703 added, 834394 removed)
Total Commits: 172 (average 3.1 commits per active day, 1.1 per all days)
Authors: 8 (average 21.5 commits per author)





Wednesday, 27 July, 2016 22:02:00
YouTube

Authors: 8 (average 21.5 commits per author)

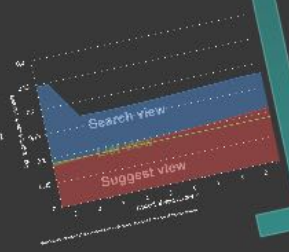


Not included: django-admin changes, large additions which were later removed and documentation stubs

The Final Product

Backend Features

- Search with default query language
- Relative filter suggestions
- Edge-N-gram typeahead suggestion
- Automatic keyword extraction
- Automatic indexing



Django Admin Features

- Easy addition of new resources
- Easy management of old resources

Frontend Features

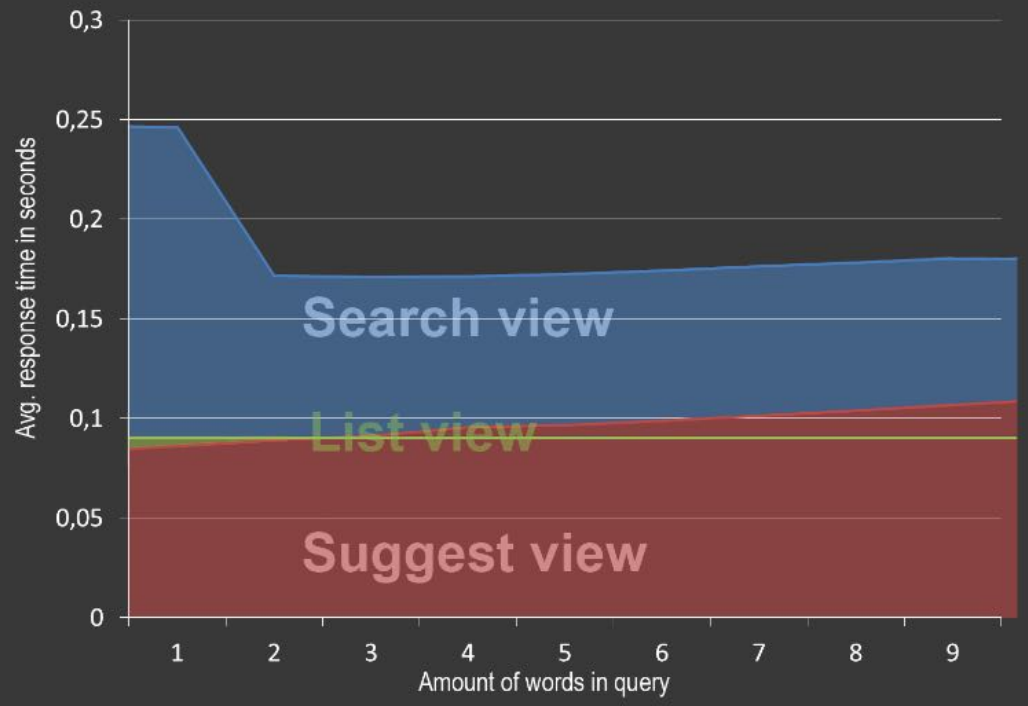
- clear interface
- comprehensive search
- filter & sort options

Possible Future Features

- Citation Button
- Advanced Search Tab
- Filter: Fulltext available?
- more documentation for Enduser and ACE Dev Team
- Blogfeature: New and exciting papers on landing page?
- clickstream analysis tool

Backend Features

- Search with *default query language*
  `title:"protection", [apple TO bear], *-charity, etc.`
- *Relative filter suggestions*
- *Edge-N-gram typeahead suggestion*
- *Automatic keyword extraction*
- *Automatic indexing*

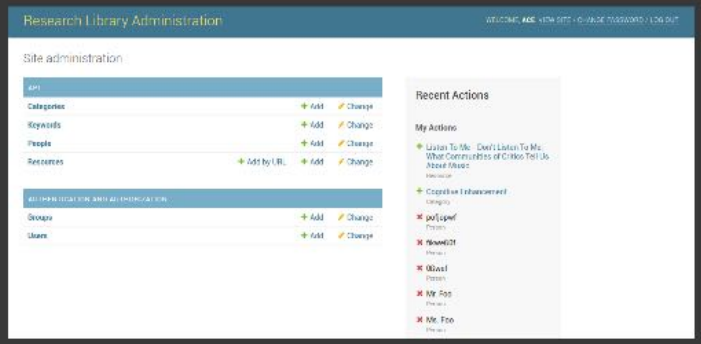


Each test was repeated 100 times with different words randomly selected from a pool of 25k english words.

Django Admin Features

- Easy addition of new resources
- Easy management of old resources

http://acerl.claviger.net/admin/



Use Case Scenario 1

Tasks:
- Login
- Add a Resource
- Try to delete the author of this Resource
- Delete whole Ressource

http://acerl.claviger.net/admin/

http://acerl.claviger.net/wordpress/researchlibrary/#/search

http://acerl.claviger.net/wordpress/researchlibrary/#/searchfull

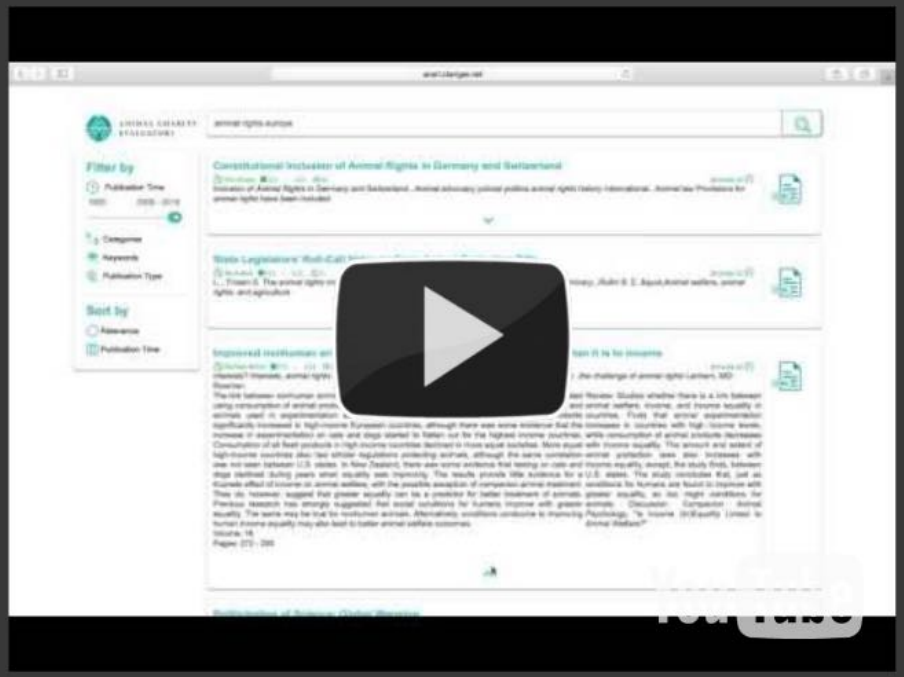
Use Case Scenario 2

Tasks:

- Search for "vegan"
- navigate freely by using filters
- Find out the oldest article for your search

Use Case Scenario 3



Tasks:

- Try to find studies regarding animal welfare in europe.

Possible Future Features

Team & Process Reflection

+

- Team building: Pokémon
- In general very harmonic

-

- Division of tasks unfair?
- Levels of knowledge too different?

Our Learnings

Building software is taping other people's code together and praying that it'll work

Pair programming is awesome

importance of user-tests

90% of the code takes 10% of your time, and the other 10% will take 90% of your time.

less code != less work

organisation is(!) important

Change small things in existing frameworks may take a lot of time

half a bachelor sometimes feels like no bachelor

Team & Process Reflection
