

Number: 15. Assignment  
Issued: 10.02.11  
Tutorial: 17.02.11  
Lecturer: Prof. Dr. Güneş, Dipl.-Inf. Blywis  
Contact: {gunes, blywis}@inf.fu-berlin.de

## Exercise 1, Questions and Answers:

If you have any questions regarding the topics we discussed in the lecture or tutorial session, write an email with the subject *Telematics Q&A* and the particular question(-s) to [blywis@inf.fu-berlin.de](mailto:blywis@inf.fu-berlin.de). You should try to formulate each question in an understandable way or otherwise we might not be able to answer it accurately. Of course, all authors of questions will remain anonymous.

The most often asked and/or relevant questions will be answered in the last tutorial session. You should consider that a complete recapitulation is not possible in the available time.

Please note that due to the time needed to prepare slides, questions are only accepted until **Monday, 14.02.10**. If you do not ask questions, it will be a very short last tutorial session!

Please note: Questions will not be answered after the final tutorial session!
