Some programming tasks in recent weeks

Before 20.03

1. From model to ASTG.

2. Model conditions checking: observability condition and Snoussi-condition.

Before 31.03
Finding attractors of an ASTG.

Before 24.03

1. Algorithm VisibilityModel. The following sub-tasks are included.
   - detecting $u$-row types,
   - Algorithm LogicalParameter,
   - Algorithm ActivityLevel,

Before 13.04
Visualize IG (or model) and ASTG.
