Some programming tasks in recent weeks

▷ **Before** 20.03

1. From model to ASTG.

2. Model conditions checking: observability condition and Snoussi-condition.

▷ **Before** 31.03 Finding attractors of an ASTG.

▷ **Before** 24.03

1. Algorithm *VisibilityModel*. The following sub-tasks are included.

   ▸ detecting u-row types,

   ▸ Algorithm *LogicalParameter*,

   ▸ Algorithm *ActivityLevel*,

▷ **Before** 13.04 Visualize IG (or model) and ASTG.
